

LET'S TALK CREATION

Episode 119: Episode 119: Creationist Plate Tectonics??? With Sarah Peterson

Plate tectonics tells us all about how the continents are drifting along at a centimeter or two a year, ever so gradually reshaping the surface of the earth, remaking the ocean floor, and causing earthquakes and volcanoes the world over. But what if it went a lot faster? In this episode, Todd and Paul chat with geophysicist Sarah Peterson about the CATASTROPHIC version of plate tectonics that has become the leading model of how the Flood happened. Sarah walks us through both the basic concepts of tectonics and how Catastrophic Plate Tectonics explains even more than the slow, conventional version. If you've ever wondered how volcanoes, earthquakes, and continental drift fit in the creation model, this episode is for you!

Papers mentioned in this episode

Petersen, Sarah and Baumgardner, John (2023) "Catastrophic Plate Tectonics and the Tectonics of Western North America," *Proceedings of the International Conference on Creationism*: Vol. 9, Article 33.
